Amendments to the Claims:

This listing of claims, in which Claims 2-33 are canceled without prejudice, will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. A tubular wire support for combination with a sheath to produce a bifurcated endoluminal prosthesis, said tubular wire support comprising:

a main body support structure having a proximal end, a distal end and a central lumen extending therethrough, the support structure comprising at least a first and second axially adjacent tubular segments, each segment comprising a plurality of wall struts connected by proximal and distal bends;

a first branch support structure having a proximal end, a distal end and a central lumen therethrough connected to the main body support structure;

a second branch support structure having a proximal end, a distal end and a central lumen extending therethrough, connected to the main body support structure;

at least two sliding links in between the first and second segments; and

at least one lock on a wall strut for limiting axial movement of a sliding link along that strut.

2-33. (Canceled)
